

Sales Beta - Merchant Application Interface Specification

Version 3.1. The sales system sends one JSON document per merchant application.

3 Merchant

Field Path	Data Type	Mandatory	Max Length	Valid Values	Description
applicationRef	String	Y	24		Reference the sales system gives the application
merchant.legalName	String	Y	100		Registered legal name of the business
merchant.tradingName	String	N	100		Doing-business-as name, when different
merchant.taxNumber	String	Y	11		EIN, or the owner's SSN for a sole proprietor
merchant.businessType	String	Y		CORP LLC SOLE	Legal structure of the business
merchant.categoryCode	String	Y	4		Merchant category code (MCC)
merchant.annualCardVolume	Decimal	Y			Expected yearly card sales in US dollars

4 Owners

Field Path	Data Type	Mandatory	Max Length	Valid Values	Description
owners[].fullName	String	Y	120		Owner's full legal name
owners[].ownershipPercent	Decimal	Y			Share of the business the owner holds, 0 to 100
owners[].dateOfBirth	Date	Y			Date of birth, YYYY-MM-DD
owners[].email	String	N	254		Contact e-mail address

5 Channel mix

The request also carries channel.cardPresentPercent, an integer from 0 to 100 giving the share of card-present sales. It is mandatory. channel.ecommercePercent gives the online share in the same way and is optional. Support contact: onboarding@salesbeta.example, 555 010 4477.
